

Nagireddi Yashaswini

+91 8008345325 | [✉ nagireddi.yashaswini@gmail.com](mailto:nagireddi.yashaswini@gmail.com) | [🌐 LinkedIn](#) | [🐙 GitHub](#)

Summary

Aspiring AI Engineer and Full-Stack Developer with hands-on experience in Machine Learning, Deep Learning, Computer Vision, Generative AI, and Full-Stack Development. Skilled in Python, React.js, Node.js, YOLOv8, OpenCV, SQL, Power BI, NLP, OCR, and LLM Integration. Passionate about building intelligent AI-driven applications and scalable software systems for real-world problems.

Education

Indian Institute of Information Technology Design and Manufacturing Kurnool 2024 – 2028
B.Tech in Artificial Intelligence and Data Science *Kurnool, India*

Experience

Artificial Intelligence Engineer Intern **2026**
Infosys Springboard | [Certificate](#) *Remote*

- Engineered an AI-powered personalized content generation platform using Large Language Models (LLMs) and prompt engineering techniques, supporting 5+ intelligent content generation modules.
- Designed automated workflows for generating LinkedIn posts, advertisements, professional emails, conversational text, and personalized media content, reducing manual content creation effort by 60%.
- Built a full-stack AI application using React.js, Node.js, Express.js, Python, and Streamlit, improving user interaction efficiency and AI response handling.
- Integrated LLM APIs and enhanced prompt optimization pipelines through testing, debugging, and iterative fine-tuning, improving AI response relevance and consistency.

Projects

Business Impact Analysis & Recovery Dashboard | **Power BI, Python** | [Demo](#) *2025*

- Created interactive Power BI dashboards with 10+ KPI visualizations to analyze customer behavior, operational recovery trends, and revenue impact.
- Performed customer segmentation, SLA tracking, cancellation analysis, and sentiment visualization using business intelligence and data analytics techniques.
- Automated reporting workflows and interactive visualizations to support faster data-driven business decision-making.

AI Traffic Violation Detection System | **YOLOv8, OpenCV, Python, OCR** | [Demo](#) *2026*

- Built a real-time AI-powered traffic monitoring system for detecting helmets, motorcycles, and traffic violations from CCTV video feeds.
- Implemented OCR-based number plate recognition with YOLOv8 and OpenCV, enabling automated detection and recording of traffic violations in real time.
- Enhanced object tracking and evidence storage pipelines for efficient CCTV-based traffic surveillance and automated monitoring.

Skills

Programming Languages: Python, C, C++, JavaScript, SQL, PHP

AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, LLM Integration, Prompt Engineering, NLP, YOLOv8

Computer Vision: OpenCV, OCR, Object Detection, Real-Time Video Processing

Web Development: React.js, Node.js, Express.js, HTML, CSS, Bootstrap, Streamlit, MySQL

Tools & Platforms: Git, GitHub, VS Code, Power BI
